

RASAL HOSSAIN

MERN stack Developer. Android (ionic framework) Developer

📞 01934544352 @ adibrasel.com@gmail.com 🔗 <https://github.com/AdibRasel>

SUMMARY

Highly skilled and motivated Full Stack Developer with a proven track record in designing and implementing complex software solutions. Possessing extensive experience in both front-end and back-end development, I bring a versatile skill set that includes proficiency in web technologies, server-side languages, and mobile app development.

EXPERIENCE

Web Developer

Imo Holidays 📅 01/2020 - 03/2020 📍 Badda, Dhaka

It is a travel agency, where domestic and international travel is facilitated

- Designed the complete website for this company
- I transferred the domain from one company to another

Customer Service Officer

Bank Asia (Agent Banking)

📅 04/2020 - 12/2021 📍 Shahapur, Chatkhil, Noakhali

They used to do all the transactions that should be done in Agent Bank, it is ranked 7-8 in Bangladesh, I worked here for many days and made many types of web sites for them, which they still work.

- I provided complete customer service.
- I have created this website to show the best services. <https://bank-asia.netlify.app/>
- This page has been created for various tasks, from here complete account information can be printed, DPS calculation, TDS calculation, and remittance incentives are calculated from here. https://adibrasel.github.io/Bank_Asia_Office/

Computer Operator

Union Land Office 📅 01/2022 - 08/2023 📍 Shahapur, Chatkhil, Noakhali

All land related work under Bangladesh government was done in this office.

- Completed all computer related work of Union land office, starting from data entry.
- I have created a web site for this office, where many types of work can be done easily. https://adibrasel.github.io/Tosil_Office/

Junior Software Engineer

Urban IT Solutions. <https://adibrasel.urbanitsolution.com>

📅 09/2023 - Present 📍 Mirpur-10, Dhaka, Bangladesh.

A variety of software is developed here, including Websites, Android apps and Desktop apps. Many projects of Bangladesh government work here.

- Here I work on Android app development.
- First of all I design 2 full apps here.
- Then for the first app I created the backend, created APIs for login, registration, creating data, reading data, modifying data and deleting data.
- Then given the APIs from Office, I apply them to the full app. Alhamdulillah the project has been completed.
